Smart Home Planning Brochure

Technology that supports the design

A room-sensitive smart home plan for lighting, comfort, security and energy control without turning the home into a gadget showroom.

What you receive

Included deliverables
• Lighting scene plan for living, cooking, sleep and away modes
• Smart thermostat and sensor placement notes
• Security and video doorbell planning
• Speaker, charging and cable-control guidance
• Compatibility checklist before buying devices

Pro tips

• Start with lighting scenes before buying many devices; lighting creates the most visible daily benefit.

• Use smart dimmers where possible instead of only smart bulbs.

• Place controls where people naturally enter and leave rooms.

• Avoid mixing too many ecosystems unless there is a clear reason.

• Hide routers, hubs and charging stations inside ventilated furniture or utility zones.

Suggested budget range

Starter setup	$500 - $1,500	Smart thermostat, doorbell and selected lighting controls
Whole-home comfort	$1,500 - $5,000	Lighting scenes, sensors, smart locks and speaker zones
Advanced integration	$5,000 - $15,000+	Integrated control, security, shading and multi-room audio

Recommended timeline

Week 1: Device inventory, Wi-Fi and room-use review

Week 2: Lighting, comfort and security scene map

Week 3: Shopping list and installation sequence

Featured project idea

A three-bedroom home reduced visual clutter by using smart dimmers, discreet ceiling speakers, a central charging drawer and simplified app groupings by room.

Next step: use the website contact form to share photos, rough measurements, timeline and the top three problems you want to solve.
